

Intervene Before Reacting: *A Positive Integrated Approach to Behaviours in the Child Care Environment*

This manual was written to dispel many myths in dealing with children's challenging behaviours. It takes a holistic look at behaviour, reinforces existing knowledge and enhances the ability of Early Childhood Educators to implement this knowledge effectively in child care settings.

The reader is guided through the process of behavioural change by using two distinct pathways: The Environmental Pathway to Behavioural Change and The Behavioural Pathway to Behavioural Change. The manual was conceived for the reader to easily know where he or she is in the different pathways, yet can be used in a flexible and integrated manner allowing the reader to access and combine information from different sections and pathways. One unique feature of this manual is the **CISS Child Care Environment Assessment Tool**.

Many charts and sheets are provided that may be photocopied and used in child care settings. **Please note that there are restricted reproduction permissions for their use and application.** The rest of the manual may not be reproduced in any form or by any means.

Order Details:

	Quantity	Price	Total
